**Consero Launches High-Demand SEC Reporting Service for Public Companies**

*Company Brings Dedicated Staff with Deep Domain Expertise for Enhanced Continuity in the SEC Reporting Process*

**AUSTIN, Texas – October 10, 2008** – [Consero Global Solutions](#), a recognized leader in finance and accounting (F&A) outsourcing services, announced the latest launch in a series of innovative offerings — its [SEC Reporting Service](#). Consero brings its highly experienced offshore staff to bear for public companies who struggle to find and retain local resources with SEC reporting experience. With a staff attrition rate well below that of U.S. companies, Consero provides the reporting best practices and continuity of service public companies seek at a 50-60 percent cost savings over local resources.

The process of creating and publicly disclosing financial statements is a laborious and time consuming activity for public companies. It also requires a specific expertise to do properly and accomplish within prescribed deadlines. As a result, many CFOs hire or contract individuals specifically for this activity. Unfortunately, in-house resources are difficult to retain due to the rote nature of the work, while consultants are expensive and do not provide continuity from one reporting period to another.

Consero now offers CFOs a better alternative. By utilizing Consero's experienced SEC reporting resources, CFOs leverage the accumulated, company-specific knowledge of an internal employee combined with the industry best practices of an external consultant. Consero provides its clients expertise that will drive timely and accurate SEC reporting at significant cost savings.

As part of its **SEC Reporting Service**, Consero provides:

- Financial Statement Preparation
- Recommendations on New GAAP and SEC Requirements
- Liaison to SEC Reporting Stakeholders
- Coordination of All Reporting Activities
- Full Compliance with SOX Disclosure Requirements
- Investor Relations Support

“Consero continues to take a leadership position in the offshore finance and accounting markets by offering high-demand services utilizing our expertly trained and dedicated staff,” said Scott Tynes, CEO of Consero. “Consero’s new SEC Reporting Service is further evidence of our commitment to offer real and sustainable value to our clients.”

**About Consero Global Solutions**

Consero Global Solutions provides outsourced finance and accounting services delivering the financial sophistication and efficiency of the Fortune 1000 to companies of all sizes allowing them to reduce costs by 50-60% while making more informed business decisions. Named in 2008 as the #1 worldwide provider of outsourced finance and accounting solutions for mid-market companies by the *Black Book of Outsourcing*, Consero offers full-service accounting and financial planning and analysis to its clients across multiple industries.
