Consero Introduces Cost Effective, Long Term SOX Compliance Solution

Company Provides Superior Results While Driving Costs Out of Compliance Activities

AUSTIN, Texas – December 15, 2008 – [Consero Global Solutions](#), a recognized leader in finance and accounting (F&A) outsourcing services, unveiled its [SOX Compliance Service](#) helping companies implement controls and reporting requirements to meet the standards of the Sarbanes-Oxley (SOX) Act. Consero Global Solutions provides the expertise and methodology to drive and maintain compliance—all at a 50-60 percent cost savings over local resources.

SOX was enacted in 2002 to help improve quality and transparency in financial reporting. The main wave of SOX compliance activities has largely ended leaving public companies focused primarily on maintaining their SOX compliance status. Companies in a dynamic business environment typically find these ongoing maintenance and audit activities require significant time and resources to accomplish. For companies who want to go public, becoming SOX compliant is simply a laborious and expensive effort. Both of these scenarios require a service provider with the right experience and methodology to execute effective and timely compliance activities – from implementation to audit.

Consero Global Solutions created its SOX Compliance Service with its offshore finance and accounting model to help meet these reporting requirements. By utilizing Consero's experienced SOX reporting resources, CFOs get the best of both worlds – expert resources at significant cost savings over local resource options.

As part of its [SOX Compliance Service](#), Consero provides:

- Establishment and execution of all COSO-described compliance areas
 - Internal control environment
 - Risk assessment
 - Control activities
 - Documentation and reporting structure
 - Monitoring and updates
- Liaison for all SOX compliance stakeholders
- Periodic 3rd-party auditing and reporting

“Our SOX Compliance Service is another example of our commitment to providing the industry’s most complete outsourced financing and accounting services to our clients,”

said Scott Tynes, CEO of Consero. “Our people, proven methodology, and superior results set us apart from the industry and provide a unique value proposition for public companies.”

About Consero Global Solutions

Consero Global Solutions provides outsourced finance and accounting services delivering the financial sophistication and efficiency of the Fortune 1000 to companies of all sizes allowing them to reduce costs by 50-60% while making more informed business decisions. Named in 2008 as the #1 worldwide provider of outsourced finance and accounting solutions for mid-market companies by the *Black Book of Outsourcing*, Consero offers full-service accounting and financial planning and analysis to its clients across multiple industries.
